ZoomInfo Talent helps recruiters find, organize, and connect with the right candidates using ZoomInfo's data. An admin can connect the Zoho Recruit integration to enable their organization's recruiters to export candidates and manage them in Zoho Recruit.

To get connected:

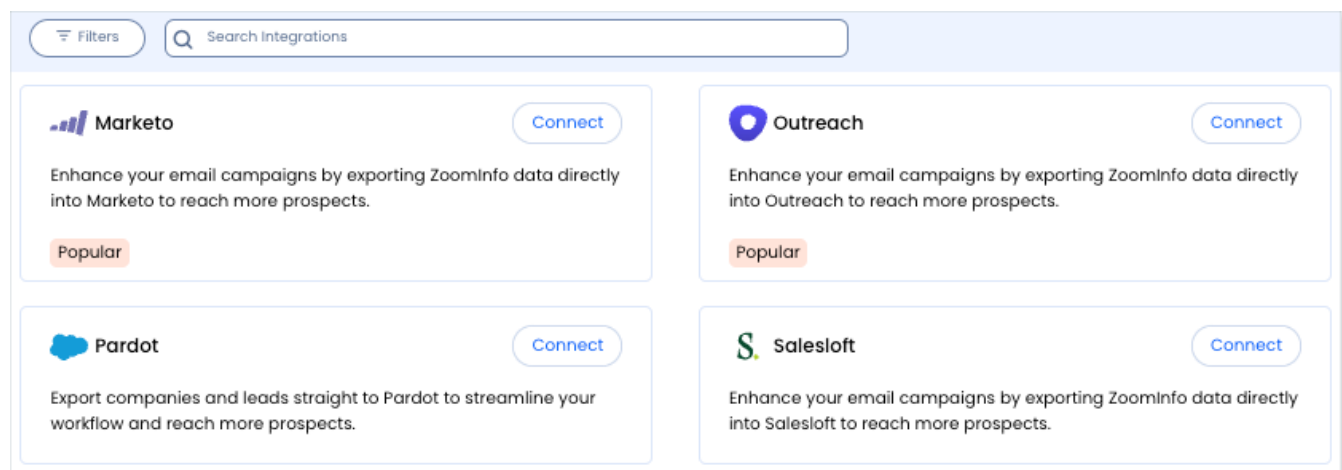

1. A ZoomInfo Talent admin establishes the connection to Zoho Recruit and configures export and custom mapping settings for their organization.
2. The admin enables the integration for their organization's users.
3. Users connect to Zoho Recruit using their credentials to begin exporting accounts, contacts, and leads.

Configure the Connection

1. Login to ZoomInfo and select **Admin Portal** from the waffle menu.

2. Click **Integrations**.

3. Use the **Filters**, or **Search integrations** options to find your integration.
4. On the tile for your integration, click **Connect**.

5. Complete the connection using your credentials.

Configure Integration Settings

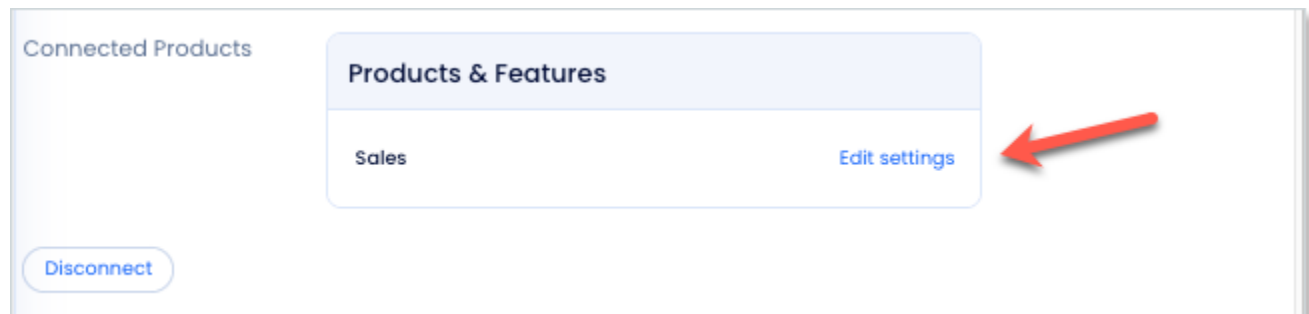

Once your integration is connected, you can configure the settings, including export preferences and mapping:

To access the **Settings** page for your integration:

- Click **Edit Settings** from the connection success message.
- If you've already closed the connection success message, navigate to the **Connected** tab and click ... > **Settings** in the **Action** column.

The **Settings** page displays. Click **Edit settings** to begin configuring your integration.

Configure Export Preferences

ZoomInfo admins can configure export preferences and limit the objects that can be exported:

1. Click the **Export** tab.
2. Select the export options for exporting ZoomInfo records to Zoho Recruit.

The screenshot shows the 'Export' tab selected in the top navigation bar, with a 'Save Changes' button in the top right corner. The main heading is 'Export Preferences', with a link 'Back to default preferences' on the right. Below the heading is the instruction 'Select which object types your users are allowed to export to Zoho Recruit?'. There are three expandable sections: 'Accounts' (checked), 'Contacts' (checked), and 'Candidates' (checked). The 'Candidates' section is expanded, showing a text input field for 'Max number of candidates a user can export to Zoho Recruit at a time (up to 2,000):' with the value '2000'. Below this is a section titled 'Create and Update Rules:' with two radio button options: 'Create new Candidates' (selected) and 'Update existing Candidates'.

Note: You can adjust the maximum number of records a user can export.

3. Click **Save Changes** to apply the changes for all users in your organization's ZoomInfo instance.

Configure Custom Mapping

Click the **Mapping** tab.

Mapping Export Save Changes

Accounts Contacts **Candidates**

Set the universal default currency for mapping (All record types) to: USD United States Dollar

Mapping

ZoomInfo Field		Zoho Recruit Field	Example	Update Option
* First Name	→	First Name	e.g. Hila	Complete if missing
* Last Name	→	Last Name	e.g. Nir	Complete if missing
Person LinkedIn URL	→	Additional Info	e.g. https://www.linkedin...	Complete if missing
Mobile Phone Number	→	Phone	-	Complete if missing
Email Address	→	Secondary Email	e.g. hila.nir@zoominfo.com	Complete if missing
Job Title	→	Job Title	e.g. Vice President of Mark...	Complete if missing

Reset All + Add Field Test Mapping

On the **Mapping** tab, review the default mapping for each object type and make any changes.

Field	Description
ZoomInfo Field	Available ZoomInfo fields. Required fields are marked with an asterisk (*).
Zoho Recruit Field	Available Zoho Recruit fields. These fields are retrieved directly from your Zoho Recruit instance.
Update Options	Select an option: <ul style="list-style-type: none">Complete if missing (default) - Only complete with ZoomInfo data if none exists in Zoho Recruit.Overwrite field - Overwrite existing data in Zoho Recruit with ZoomInfo data.

Add or Remove Fields

Add fields by clicking **Add Row** at the bottom of the field list. Each field that you add must be mapped to a corresponding field in your integration.

Click the trash icon to remove any fields that you do not want to map.

Personal Phone and Email Mapping

The default mapping for the Zoho Recruit integration for ZoomInfo Talent is specific to talent acquisition use cases. For example, the phone and email mappings for contacts are focused on personal contact information instead of business contact information.

In ZoomInfo:

- A contact's business email address is stored in the **Email Address** field, and the personal address is stored in the **Supplemental Email** field.
- A contact's business phone number is stored in the **Phone** field, and the personal phone number is stored in the **Mobile Phone Number** field.

In ZoomInfo Talent:

Because recruiters typically want to engage with candidates through personal channels, we have included the **Mobile Phone Number** and **Supplemental Email** fields in the default mapping.

A screenshot showing two dropdown menus stacked vertically. The top dropdown is labeled 'Mobile Phone Number' and the bottom dropdown is labeled 'Supplemental Email'. Both have a downward arrow icon on the right side.

If you want to also map the business email and phone number, you can click **Add Row** and map the ZoomInfo **Email Address** and **Phone** fields to corresponding fields in your integration.

Set a Hierarchy for ZoomInfo Data Within a Single Zoho Recruit Field

In some cases, you may want multiple ZoomInfo fields to be stacked hierarchically within a single Zoho Recruit field. For example, you want to import the ZoomInfo **Supplemental Email** (personal) and **Email Address** (business) fields into the Zoho Recruit **Email Address** field.

A screenshot showing a mapping hierarchy. The first row shows 'Supplemental Email' mapped to '1 Email'. The second row shows 'Email Address' mapped to '2 Email'. Each mapping is represented by a dropdown menu on the left, an arrow pointing right, and another dropdown menu on the right. The second row is highlighted with a light gray background.

In this example:

- When contacts are exported to Zoho Recruit, **Supplemental Email** will map to **Email**.
- If a contact has both a **Supplemental Email** address and business **Email Address** in ZoomInfo, the first occurrence of the Zoho Recruit field will be denoted with number 1, and the second will be number 2.
- If a specific contact does not have a **Supplemental Email** in ZoomInfo, we will send the business **Email Address** field to the **Email** field in Zoho Recruit.

Test and Save

Before saving your mapping changes, click **Test Mapping** to export and delete a test record using your current settings.

- If the test record cannot be created, this is typically due to an error in the mapping settings. For example, mappings cannot be saved with a blank field.

Adjust the settings and click **Test Mapping** again.

- If the test is successful, a notification displays.

After performing a successful test mapping, click **Save Changes**.

- If the mappings are not set correctly, an error notification displays indicating the adjustments needed.

Remove any unfilled rows and click **Save Changes** again.

- If mappings are correctly configured, a success notification displays.

View and Manage Connected Integrations

Once you've connected one or more integrations, you can view and manage them on the **Connected** tab of the **Admin Portal > Integrations** page.

Connected 19 All Integrations [+ New Integration](#)

To maximize your experience, Zoominfo now connects with the apps and products your organization is already using. Search, add, and manage your integrations here.

Integration Name	Date Connected	Category	Actions
<input checked="" type="checkbox"/>  PC Recruiter	Jun 13, 2022	ATS	...
<input checked="" type="checkbox"/>  Salesloft	Oct 10, 2022	Sales/Marketing	...
<input checked="" type="checkbox"/>  HubSpot	Oct 31, 2022	CRM	...
<input checked="" type="checkbox"/>  Salesforce	Dec 2, 2022	CRM	...

On this page, you can:

1. Use the toggle to turn an integration on or off for users in your organization. Toggling an integration to off does not affect the mapping and export settings you've configured.
2. Update the settings for an integration by clicking the integration name, or by clicking ... > **Settings** in the **Action** column.
3. Delete a connected integration (including any mapping and export settings you've configured) by clicking ... > **Delete** in the **Action** column.

Connect Users

Once the ZoomInfo admin has enabled the integration for all users by clicking the toggle to the left of the integration in the Admin Portal, individual ZoomInfo Talent users can connect to Zoho Recruit.

Admins should share the following link with users for instructions on [how to connect Talent to Zoho Recruit](#).
